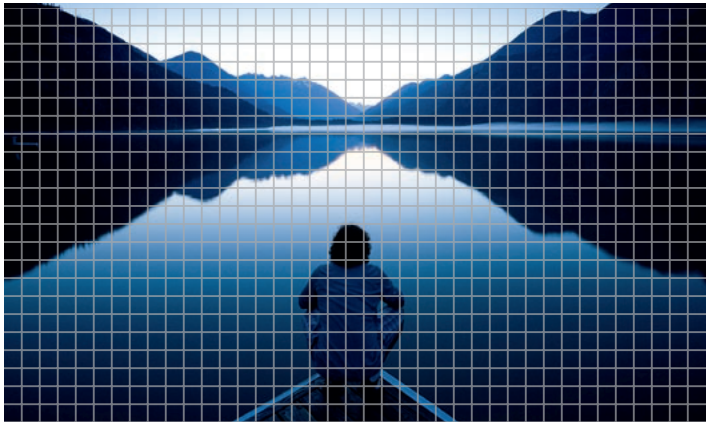
Canon
Tell your story.
Canon camcorders.
LEGRIA
you can

LEGRIA Put your world in motion.

Harnessing industry-leading technology and more than 70 years of imaging know-how, Canon LEGRIA camcorders help you tell your story. Whether you choose the stunning detail of Full High Definition (HD) or easy-to-share Standard Definition (SD), capture life as you live it.

What is HD?

Full HDTV displays images that are 5x the image size of Standard Definition screens, and every Canon LEGRIA HD camcorder makes the most of this: recording widescreen movies at an eye-popping 1920 x 1080 resolution.



Full HD TV: 1920 x 1080 resolution

Choosing the right camcorder.

Choose HD

Astonishingly realistic detail, colour and quality are the hallmarks of Canon's LEGRIA Full HD camcorders. Shoot great-looking movies anytime, anywhere – play them back on an HDTV in cinematic widescreen.

Choose SD

Standard Definition (SD) is great for quick and easy moviemaking. Shoot on a compact LEGRIA SD camcorder, then easily edit footage on your home computer before uploading to the internet. SD movies also look great on your current TV.

Normal TV: 720 x 576 resolution

The advantages of flash memory.

Flash memory is fast and responsive, lightweight, incredibly power efficient, and – because it has no moving parts – safe. Camcorders with Dual Flash Memory let you copy movies and photos from internal memory to removable, easy-to-share SDHC cards. New to selected LEGRIA models, Intelligent Relay Recording automatically switches to memory card recording once the internal memory is full.

DUAL
FLASH
MEMORY

The Canon Advantage.

HD Video Lens

Canon video lenses
With over 50 years experience in the broadcast business, only Canon – the world's leading photographic company – can bring its unique blend of expertise to a camcorder lens.

HD CMOS SENSOR

HD CMOS
Canon HD CMOS sensors require little power, are more sensitive in low light, and provide brilliant colour balance.

DIGIC DV III

DIGIC DV III
An image processor handles the raw data received from the sensor and converts it into the pictures you watch. The DIGIC DV family of processors lies at the heart of the superior imaging quality of Canon camcorders – for both video and still photos.

Hold steady.

Optical Image Stabilizer (OIS) systems
Since the extra detail of HD movies makes even the smallest shakes noticeable, Canon LEGRIA employs a range of advanced optical stabilisation systems.

Super Range OIS compensates for all kinds of movement, while **Dynamic OIS** improves stability when filming wide shots.
Canon's unique **Powered OIS** dramatically boosts stabilisation at maximum zoom.*

SuperRange OPTICAL IMAGE STABILIZER

OPTICAL IMAGE STABILIZER DYNAMIC

OPTICAL IMAGE STABILIZER POWERED

** Not all features are available on all camcorders. Please refer to the table at the back of the brochure.*

Face Detection Technology

Face Detection

Face Detection Technology detects the faces of up to 35 individuals – you select the star of your movie, always keeping him or her in focus. Face Detection AE (Auto Exposure) and Face Detection AF (Auto Focus) combine to quickly and accurately track and focus each face. Use the Face Jump and Face Timeline features to search through your footage by simply spotting friends' faces.

Touch Screen

Touch-screen with Touch & Track

Canon's unique, gesture-based touch-screen puts control at your fingertips. Features such as Touch Focus, Touch Exposure and Touch Tracking let you alter shooting settings by touching and swiping the screen. 3D Flip View is a similarly innovative way to search through your footage: it's never been easier – or more fun.

Smart AUTO

Smart Auto

Smart Auto makes moviemaking as easy as possible. Intelligent Scene Detection Technology identifies what you're shooting, then selects the best combination of settings from up to 31 different scene types. In combination with Canon's unique Instant AF system and Face Detection Technology, Smart Auto means that friends and family always look their best.

* *Not all features are available on all camcorders. Please refer to the table at the back of the brochure.*

Making it easy.

Video Snapshot

Video Snapshot

Capture movie snapshots each time the Record button is pressed. These short clips are easy to put together in a simple multi-shot movie: even take snapshots from video you've already made. Give your movie a soundtrack in-camera, then burn to a DVD.

Pre REC

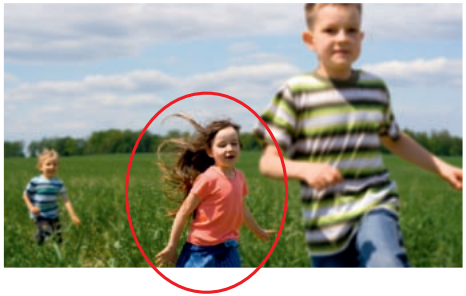
Pre REC

While the camcorder is switched on, three seconds of footage are continuously stored. Press the Record button and these seconds are added to the beginning of your clip – it's like going back in time and a great way to make sure that you don't miss the shot.

Instant AF

Instant AF

Canon's unique Instant AF system uses two auto focus systems to achieve brilliant focus at speed.



Cinema Mode

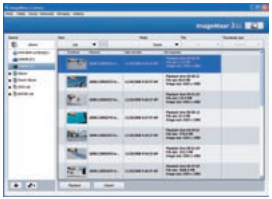
Program AE scene modes

Up to 14 scene modes are available, making it easy to find the perfect settings for your shooting situation. Available modes include Sunset, Night, Snow and Beach. Get more creative by taking manual control. Choose 25p Cinema Mode for a look that's similar to traditional film.

* *Not all features are available on all camcorders. Please refer to the table at the back of the brochure.*

Shoot & share.

With a Canon LEGRIA camcorder, it couldn't be easier to share your movies.



PIXELA ImageMixer™ software

It's a viral hit

Easily transfer clips to YouTube™ using supplied PIXELA ImageMixer™ software (PC only). The Easy Web Upload tool helps you upload your movie clips to YouTube™ in just a few simple steps. You can add titles and notes, and it will even remember your user name and password

HD-to-SD conversion

Before uploading clips to the web, convert HD movies to SD in-camera. You can also choose to convert video to a size perfect for burning to DVD, or turn a complete playlist into a single movie. For more options, PIXELA ImageMixer™ software offers a range of advanced conversion features.

Screen star

To watch your movies on a compatible HDTV, simply connect your LEGRIA HD camcorder using a single HDMI™ cable. Both HD and SD camcorders can connect and playback on HD or SD TVs using supplied cables.

In the edit

Connect your LEGRIA camcorder to a computer and open a world of creative possibilities: the bundled PIXELA ImageMixer™ offers a range of easy to use editing features. Movies shot on a Canon LEGRIA camcorder are also compatible with other popular editing packages.

Share the wealth

It's easy to burn a DVD or Blu-ray disc using supplied software. Play movies directly from memory cards in compatible card readers and TVs with card slots built-in.

* *Not all features are available on all camcorders. Please refer to the table at the back of the brochure.*

LEGRIA HF R16/R17*

EVERYTHING YOU NEED TO GET STARTED IN HD.

Get into HD moviemaking with the LEGRIA HF R16 / R17*. Lightweight, stylish and undeniably chic, it offers **8GB** internal memory and memory card recording – all you need to make your own Full HD masterpiece.

- Dual Flash Memory: 8GB internal memory and SDHC card recording
- Easy to shoot: Smart Auto selects the best settings for you
- Video Snapshot: create simple movies with music in-camera
- 20x optical zoom lens with EIS; Dynamic IS for steady shots on the move
- Easy to share: HD-SD conversion in-camera for easy web upload (software supplied)

** HF R17 available in black only.*

LEGRIA HF R106

READY. SET. RECORD.

If you're new to moviemaking, the LEGRIA HF R106 might be the perfect camcorder for you. Affordable and easy to use, it's packed with features that help you get the best results in Full HD.

- Canon's smallest, lightest Full HD camcorder
- Record directly to SDHC memory cards: great for sharing with family and friends
- Easy to shoot: Smart Auto selects the best settings for you
- Video Snapshot: create simple movies with music in-camera
- 20x optical zoom lens with EIS; Dynamic IS for super steady shots on the move

LEGRIA HV40

GET CREATIVE – IN HIGH DEFINITION.

The LEGRIA HV40 is a High Definition moviemaker's camcorder, offering the flexibility to realise your creative vision. Take manual control of different settings using the customisable Control Dial.

- Canon HD Camera System for outstanding HDV1080i movies
- Instant AF: fast and accurate auto focus
- Genuine Canon HD Video Lens, with 10x optical zoom and Super Range OIS
- Creative manual control: Custom Key and user assignable Control Dial
- Advanced Accessory Shoe, manual audio control and a full range of connections, including HDMI
- 6.7cm (2.7") Multiangle Vivid LCD screen
- 50i plus cinematic 25p shooting, with CINE image mode for a film look
- Advanced photo features: shoot simultaneous video and 2.07MP stills
- AV input and analogue-to-digital converter – great for storing old movies
- Optional lens adaptors and BP-2L24H long life battery

STANDARD DEFINITION

LEGRIA FS37

DUAL FLASH MEMORY

LIFE ON THE GO.

Go anywhere, shoot anywhere with the LEGRIA FS37 – Canon's smallest ever digital camcorder. Capture great-looking SD movies to **16GB** internal flash memory or use memory cards for easy sharing.

- Best of both worlds: Dual Flash Memory with 16GB internal memory and SDHC card recording
- Go anywhere: Canon's smallest digital camcorder – ever
- Edit movie clips and add music in-camera with Video Snapshot
- 41x Advanced Zoom gets you closer
- Dual Shot: easily capture video and photos with only 2 buttons
- Image Stabilizer with new Dynamic mode
- Never miss a shot with Pre REC
- True Wide Hi-Res 16:9 system: true widescreen recording and 6.7cm (2.7") widescreen LCD
- Intelligent battery: shoot for up to 3.5 hours on a single charge; Quick Charge recharges one hour in just 20 min

41x Advanced Zoom · Genuine Canon Video Lens · DIGIC DV II · Video Snapshot · IMAGE STABILIZER DYNAMIC · Pre REC · Intelligent Li-ion Battery · Dual Shot · Quick Start

LEGRIA FS36

DUAL FLASH MEMORY

YOUR EYE ON THE WORLD.

Small enough to be carried in your pocket, take the LEGRIA FS36 literally anywhere. With a range of handy features, make great looking movies of your daily adventures and upload them to the web.

- Best of both worlds: Dual Flash Memory with **8GB** internal memory and SDHC card recording
- Go anywhere: Canon's smallest digital camcorder – ever
- Edit movie clips and add music in-camera with Video Snapshot
- 41x Advanced Zoom gets you closer
- Dual Shot: easily capture video and photos with only 2 buttons

LEGRIA FS306/FS307*

LIVE LIFE TO THE FULL.

Choose the LEGRIA FS306 / FS307* and start sharing your world online. Shoot straight to memory cards then easily upload movies to the web. Video Snapshot mode lets you edit clips and add music in-camera.

- Record directly to SD and SDHC memory cards – great for sharing or uploading to the internet
- Go anywhere: Canon's smallest digital camcorder – ever
- Edit movie clips and add music in-camera with Video Snapshot
- 41x Advanced Zoom gets you closer
- Dual Shot: easily capture video and photos with only 2 buttons

** FS307 available in grey only.*

Accessories.

Go wide
In confined indoor spaces, Canon Wide-Angle Lenses (WD-H58, WD-H43, WD-H37 II) let you fit more into the frame.

Get closer
A Canon Tele Converter (TL-H58, TL-H43, TL-H37) makes shooting subjects appear that much closer: up to 1.7x – great for sporting events or concerts.

Long life
On long shooting days, a long-life battery gives you hours of extra shooting time.

Sounds good: directional microphone
Use a directional microphone (DM-100, DM-50) if you need to pick out a conversation from a noisy crowd.

Sounds good: surround microphone
Use a surround microphone (SM-V1) to pick up all the atmosphere of a scene – at a football match, for instance.

Light up
Keep on shooting when the sunlight goes down with a Canon external Video Light (VFL-1, VFL-2, VL-3, VL-5). Powered via a camcorder's accessory shoe, there's no need for extra batteries.

Get wet
If you want to take your camcorder underwater, or even into heavy snow, pick up a Canon Waterproof Case (WP-V1, WP-V2) and make sure it's protected.

**Not all accessories are available for all camcorders.*
